RING SIZER

Compare a ring you already own

LETTER paper | One page | Print at Actual Size / 100%

Turn off Fit, Shrink and Scale to page. Check both references below before using the circles.
Use a round, empty inner opening. These are not a finger strip or a guarantee of fit.

Scale check 1: ID-1 bank card

Place a standard card over this outline.

Width: 85.60 mm Height: 53.98 mm

Check BOTH dimensions.

Before comparing a ring

Place the ring flat on the page.

Match its INNER opening to a circle.

Do not match the outside metal edge.

Use the centre of the thin outline.

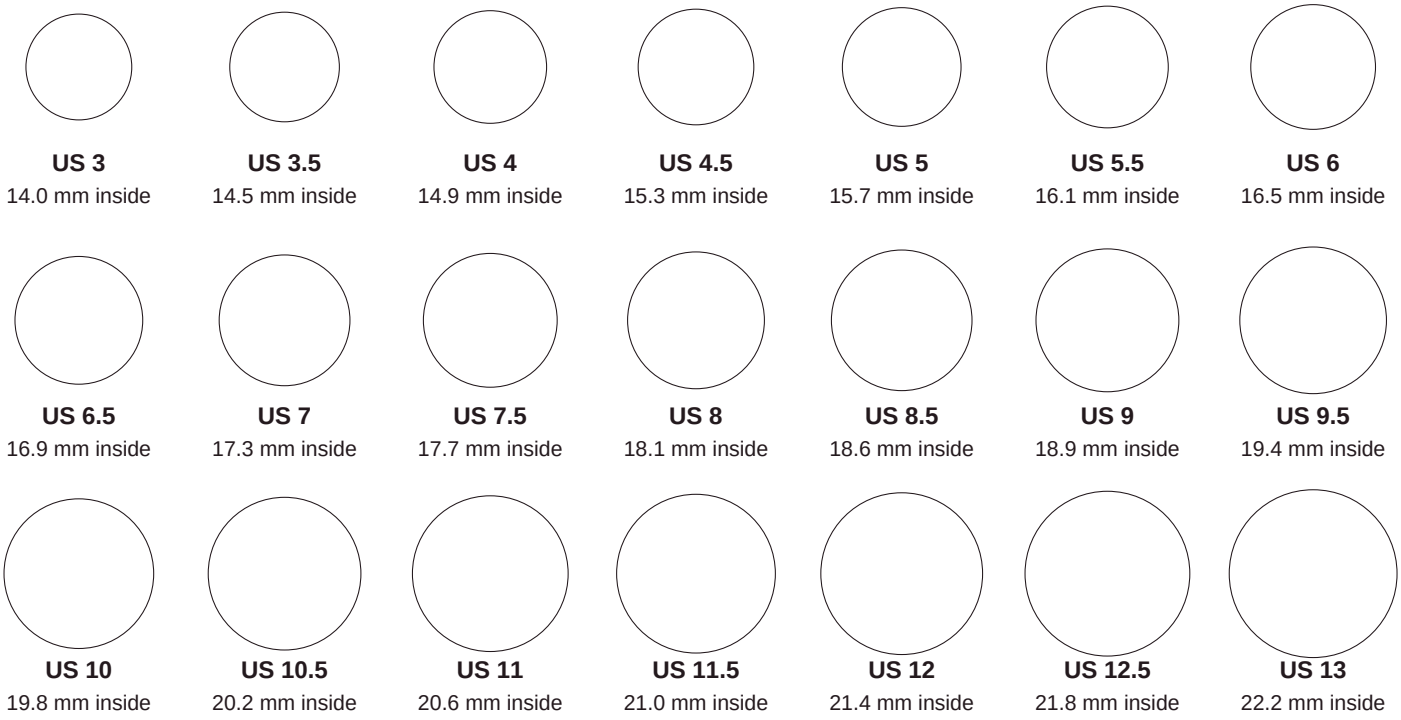

Record the diameter in millimetres.

Confirm the fit on the intended finger.

Scale check 2: measure this line with a physical ruler - exactly 100 mm

If either reference is wrong, STOP and correct the print settings. Never compensate by guessing.

US 3	**US 3.5**	**US 4**	**US 4.5**	**US 5**	**US 5.5**	**US 6**

Approximate US labels from the website's nominal chart, not manufacturing tolerances.

Keep the original millimetres. Check your seller's chart and try the intended band width and profile.
